

Flames of War: 1986 Modern COLD WAR

INDEPENDENT FORCE LISTS

v4.0

Modern FOW (COLD WAR)

INTRODUCTION

This book is a supplementary book to the Core Cold War Rule set, it is designed to add Independent Force lists and their equipment.

The lists are to add further character to the existing lists, and cover alternative forces in the European and Scandinavian Theatre. Many of the lists lack heavy armour and are made up of significant amounts of Medium Armoured Vehicles and this adds further depth and flavour to fighting with these forces.
